

Controlled Unclassified Information (CUI) Briefing

This presentation UNCLASSIFIED

January 2021

Agenda

- CUI Overview_(page 3)
- Handling and Protecting CUI_(page 4)
- Identifying CUI Information in MARS_(page 5)
- Marking CUI_(page 6)
- Training Assessment Test Questions_(page 7)

All Army MARS members are required to review this presentation and complete the short online assessment.

CUI Overview

**BLUF: FOUO is no longer a valid marking;
now use Controlled Unclassified Information (CUI)**

What is CUI?

- Government created or owned UNCLASSIFIED information that must be safeguarded from unauthorized disclosure.

Why is CUI important?

- Unlike with classified national security information, DoD personnel at all levels of responsibility and across all mission areas receive, handle, create, and disseminate CUI.
- CUI policy provides a uniform marking system across the Federal Government that replaces a variety of agency-specific markings, such as FOUO, Law Enforcement Sensitive (LES), Sensitive But Unclassified (SBU), etc.

Handling and Protecting CUI

CUI is treated the same way as FOUO

CUI, same as FOUO, is not a security classification (confidential, secret, top secret), rather it is a categorization of unclassified information that is to be protected from release to the general population.

- **CUI materials sent through Email:** Save as a file and encrypt using encryption wizard (EW). Computers storing or processing CUI should be password protected.
- **CUI Storage:** Hard copy CUI documents should be secured/stored when not in use (e.g. sealed envelope, locked Doors – Overhead bins – Drawers – File cabinet).
- **CUI Decontrol:** Occurs when the information no longer requires protection, safeguarding or dissemination controls. There will be notification when information is no longer categorized as CUI.
- **Destruction:** Will be accomplished in a manner that makes it unreadable, indecipherable, and irrecoverable. Simply tearing into pieces is **NOT** acceptable. Burning or shredding using a home document shredder are acceptable ways for destroying CUI marked documents.
- **Misuse of CUI or Unauthorized disclosure (CUI).** Occurs when an authorized holder uses CUI in a manner not in accordance with the policy and intentionally or unintentionally discloses CUI without a lawful government purpose. Misuse of CUI may result in dismissal from MARS per AR 25-6.

Identifying CUI Information in MARS

The Chief Army MARS designates the essential elements of friendly information, now referred to as CUI, in Army MARS manual AM1. The Chief may issue a memorandum updating this list each year.

Note that much of what was previously considered FOUO is now publicly releasable. Chief's intent is to avoid over-categorizing information.

The Chief's CUI list contains documentation such as:

- MARS frequency listings or documents containing both a radio frequency and frequency designator.
- MARS member rosters that list name, address, phone number, and email address
- Authentication tables, if issued

Other Friendly Information such as:

- Specific locations, unit names or any information concerning units or headquarters that MARS is supporting.
Acceptable for release are high level references that provide no specific detail such as: U.S. Northern Command (NORTHCOM), U.S. Strategic Command (STRATCOM), Pennsylvania Army National Guard;
CUI are specific units and locations, such as 3-124 Infantry Division located in training area xx at Fort Irwin, California in preparation for deployment to the middle east in two months
- Communications being provided to a specific unit at a specific location highlighting that unit's communications equipment is non-mission capable.; or revealing the status of any units capabilities.
- Specific dates for any DOD COMEX or NORTHCOM DSCA exercises to include pre-exercise coordination telcon dates.

The preferred way to manage CUI information is to not write it or otherwise communicate it when it is not necessary for other parties to know in order to perform their function.

Marking CUI

Documents containing CUI will be marked as CUI with the banner in bold letters, “**CUI**” at top and bottom of each page.

The banner marking may contain a category marking which follows the letters CUI, such as:

CUI//OPSEC (Operational Security)

CUI//PRVCY (Privacy)

CUI//DCRIT (Defense Critical Infrastructure)

The specific portion of the document or message containing CUI information will display the (CUI) portion marking. All Other portions of the document will then display the (U) portion marking.

If a document contains no CUI, the document will be marked as “**UNCLASSIFIED**” at the top and bottom of each page.

MARKINGS FOR TRAINING PURPOSES ONLY

	CUI
NETC-OP	Date
SUBJECT: (U) Subject line is Unclassified	
(CUI) The first paragraph contains CUI information as identified in the CUI Registry. Portion marking shown and highly encouraged but not required for unclassified documents containing CUI information.	
(U) The second paragraph is unclassified or uncontrolled information. Although portion markings are shown in this example, this is optional unless CUI is comingled in a classified document.	
ARYA STARK King Slayer Seven Kingdoms

Training Assessment Test

Select the best answer for each question:

- 1: What does CUI mean?
 - a. Controlled Unclassified Information,
 - b. Critical Unclassified Information,
 - c. Cellular Usage Index
 - d. Communications User Interface
- 2: What does CUI replace?
 - a. Classified document markings,
 - b. FOUO,
 - c. portion markings,
 - d. none of the above
- 3: How must CUI information be stored?
 - a. There are no special requirements,
 - b. in a government approved container,
 - c. sealed envelope, locked Doors – Overhead bins – Drawers – File cabinet,
 - d. none of the above
- 4: How is CUI marked?
 - a. In the electronic token contained in a smart card,
 - b. it is part of PKI encryption,
 - c. it is embedded in special paper,
 - d. none of the above.
- 5: How is information that contains CUI information sent by email?
 - a. The subject line contains the words “CUI to follow”.
 - b. using EW.
 - c. using 8 character group encryption,
 - d. none of the above.
- 6: Is simply tearing CUI documents into pieces an acceptable method of destruction?
 - a. Yes
 - b. No
7. In what document is the designated list of CUI information designated?
 - a. The munitions list,
 - b. the commerce controls list,
 - c. AM1 This is Army MARS,
 - d. AM6 NetPlan
